PUB GROUP TOASTS ZONAL FOR ITS OUTSTANDING SERVICE

Zonal has been recognised for its outstanding service by the UK's largest pub operator Ei Group.

The hospitality technology specialist has been installing its Aztec EPOS solutions to the Group's expanding managed estate, which has grown significantly in the past 18 months. Zonal was presented with an engraved tankard from Chief Executive Officer Simon Townsend at the annual Suppliers Conference.

Zonal Account Manager David Williams, who collected the award, said: "At Zonal we pride ourselves on delivering the highest service standards and do our very best to exceed our customers' expectations. We are delighted to have our efforts formally recognised by Ei Group and look forward to continuing to deliver outstanding products and service."

The awards are based on Ei Group's five core values: Service-led, Respect, Innovative, Collaborative and Commercial.

Head of Programme Delivery Richard Fisher added: "The Zonal team are worthy winners of the Service-Led award. They share the Group's service mind-set and see things through our customers' eyes. Zonal share our high standards and work hard to achieve and exceed them."

Zonal is now working on the next phase of its Aztec roll-out across the Group's managed house estate that will see up to a further 30 pubs active by the end of the year.
